

## File Download Preferences

Preferences for downloading files are set in the individual applications you will use to download.

### Firefox version 1

- ✓ Firefox (top menu bar) > Preferences
- ✓ Downloads
- ✓ You can choose the option of having Firefox ask you where you want to save the file each time you download something

OR

- ✓ Choose to set up a default folder by selecting *Save all files to this folder:*
- ✓ *Browse*
- ✓ Use the window that opens to choose the folder in which you want to save all your downloaded files.
  
- ✓ While in these preferences, you can also choose whether or not to *Show Download Manager when a download begins* and whether or not to *Close the Download Manager when all downloads are complete* if you do choose to *Show Download Manager*
  
- ✓ If you select *View & Edit Actions*, you can select which application on your computer will open which type of files.
  - Select the type of file
  - *Change Action*
  - Choose to open that type of file with the default application
  - OR
  - Choose *Open them with this application* and then *Browse* your computer for the application you want
  - OR
  - Choose to *Save them on my computer*
